

Overview

DeVry University and its Keller Graduate School of Management are committed to providing students with accurate information to help students make informed decisions about their education.

The educational and non-educational prerequisites for Certified Public Accountant (CPA) licensure can vary significantly from state to state and U.S. territory. These variations encompass the number of accounting and business course hours, experience, exam success, background checks¹, and ethical compliance. Understanding these differences is key to determining a student's eligibility to sit for the Uniform CPA exam and apply for licensure in different jurisdictions. The U.S. Department of Veterans Affairs regulations mandate institutions to transparently disclose any additional non-educational requirements necessary to obtain the license or certification for which the program of education is designed to provide preparation.

¹Results of a background check may disqualify an individual from obtaining licensure. As such, it is your responsibility to determine if your circumstances pose any barriers.

Education Requirements

For CPA licensure, candidates must have a total of 150 semester hours that meets one of the following conditions:

• A graduate degree with a focus in accounting from an accredited program.

Or

A graduate degree in a program that is accredited in business. This must include completion of at least 24 semester
hours in accounting at the undergraduate level or 15 semester hours in accounting at the graduate level, or an
equivalent combination.

Or

 A baccalaureate degree from an accredited college approved in a business-oriented program. This must include completion of at least 24 semester hours in business and 24 semester hours in accounting at the undergraduate or graduate level.

Acceptable accounting coverage includes subjects such as financial accounting, auditing, taxation, and management accounting. Note that these do not need to be separate courses.

Experience Requirements

Candidates are required to complete one year of work experience, either full-time or part-time (totalling 2,000 hours). This must be completed over a period that extends over a minimum of 12 months and maximum of 36 months. Work experience must be validated by a certified public accountant.

Ethics Requirements

Idaho CPA candidates must pass the AICPA Ethics Exam with a score of at least 90%.

Other Requirements

- Pass all four sections of the CPA Exam with a score of 75 or higher within an 18-month period.
- Be of good moral character.
- Must be a current or past resident of Idaho.
- Must have a Social Security number.

DVU Licensure Programs

The following DVU programs meet the educational requirements for CPA licensure in the state of Idaho:

- Master of Science in Accounting Certified Public Accountant (CPA) Exam Preparation Emphasis
- Master of Accounting and Financial Management Certified Public Accountant (CPA) Exam Preparation Emphasis

It is important to note that these determinations apply to individuals holding a bachelor's degree in accounting or a business degree with a focus on accounting or finance. DeVry's bachelor's degrees in accounting and business were used as a baseline for these determinations, and checking with your state board of accountancy is recommended to ensure that all specific educational requirements for licensure are satisfied.

CPA Review Courses

Credits obtained from CPA exam review courses cannot be used to fulfil the mandatory concentration in accounting coursework in the following states: FL, KS, NJ, NY, TX, and VT.

Accreditation

DeVry University is accredited by The Higher Learning Commission (HLC), www.hlcommission.org. The University's Keller Graduate School of Management is included in this accreditation.

Our Accounting Degrees are accredited by the Accreditation Council for Business Schools and Programs (ACBSP) www.acbsp.org. Please refer to the academic catalog for details.

Student Relocation

Students who intend to relocate should notify the DeVry University of their location change and review the professional licensure requirements of that state's professional licensing board. Visit the National Association of State Boards of Accountancy of Accountancy to find the contact information, as well as a listing of statutes for the State Board of Accountancy in each of the 55 jurisdictions. For additional information about student relocation, please refer to the student relocation notice within the academic catalog.

Other Accounting Related Programs

The programs listed below are not specifically designed to prepare students for licensure. However, they offer valuable knowledge and resources that can provide a foundation in accounting and business concepts as well as practical skills.

The undergraduate programs are classified as pre-licensure programs. For example, every state and territory require a minimum of 150 semester credits of specific coursework for CPA licensure eligibility. Generally, undergraduate programs do not provide enough credits to meet this requirement. Nevertheless, students can leverage the credits earned in these undergraduate programs toward the licensure requirements.

The Graduate Certificate in Accounting Certification Preparation program, with a Certified Public Accountant Exam Preparation option is designed to help students prepare to sit for the CPA exam by offering practical resources and focused exam preparation. Additionally, the program may offer a few extra credits in certain states to help students qualify for CPA licensure.

The remaining programs provide advanced knowledge and skills in accounting and finance to equip students for various non-licensure accounting and finance roles, such as financial analyst, management accountant, internal auditor, budget analyst, and financial manager.
