

## Student Outcomes Data by Program

**Notes:** The table below provides student outcomes data for Fall 2023. The following statements provide further insight into the data.

- Fall 2023 Total Students: Data for total students is based on students who enrolled in Fall 2023 as New and Non-New students, among those students who graduated, withdrew or were continuing by end of the Fall period.
- The academic year (AY) begins July 1 and ends June 30.
- Retention Rate is based on students who started in Fall 2022 cohort or students who changed their home location state and were still enrolled or graduated in/by Fall 2023.
- Graduation rates are based on students who start within a Fall cohort and complete their degree within 150% of the program's length (or within a 6-year period, for programs longer than 4 years). To be counted as graduates, students must start and finish within the same home state code (IL for most students home coded as Online students). Students who did not graduate are excluded from the cohort under certain circumstances (e.g., active duty, church mission, deceased within the timeframe), resulting in an adjusted cohort. Graduation rate is calculated as number of completers divided by number of students in the adjusted cohort. Students who change their program between their Fall cohort and graduation are shown in the program in which they started; however, the program they completed is used for determining 150% of the program's length.
- n/a<10 refers to less than 10 students and not representative to determine the rate.

Student Level	Award Level	Enrollment Status	Fall 2023 (Total Students)					AY2023	Retention (Fall 2022)		Graduation (Fall 2017 Cohort)
